

LM Port Cablelok - 100% Mechanical Seal

HellermannTyton's patented Cablelok™ mechanical seal enables safe cable installation, providing a highly repeatable and consistent seal between the cable and the closure port with excellent non-leak performance. Tested in excess of 6m head of water, the Cablelok does not rely on the skill and experience of the engineer to achieve the required seal, whilst installation times are typically reduced by 90%.

Features and Benefits

- Excellent sealing properties to in excess of 6m head of water (58.8kPa)
- Rapid installation with no specialist tools required
- Highly repeatable – the quality of the seal is not dependent on the skill of the engineer
- Eliminates the need for hazardous gas bottle transportation and storage
- Ideal for use in hazardous or restricted areas as no heat or gas is required for installation
- All LM Port Cableloks are dual outlet versions for loop through applications
- Proven technology in the field

- Cablelok™ - 2 mins
- Heatshrink - 20 mins

Selecting the Correct Cablelok

- Step 1:** Determine the diameter of the cable being used
- Step 2:** Identify the correct Cablelok using the port and cable ranges shown overleaf.
